Weigh Smart - One Power Scale

TAMTRON
CERTIFIED PARTNER

Display Unit

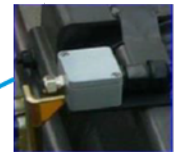

DMU Unit
(Combo of JB+ Angle Sensor)

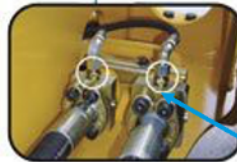

Lo-Hi Sensor

Accuracy:
+/-0.5-1%

Bucket (C) Sensor

Pressure Transducers (2nos)

Special Features Of One Power wheel loader scales

- *Weighing process based on measuring hydraulic pressure*
- *Fully dynamic weighing, i.e. no need to stop or wait for weighment*
- *Only scale with 3 modes of weighing - basic, memo and storage*
- *Upgradation from basic to higher models possible if required*
- *State of the art technology, i.e. angle compensation , valve lever compensation, auto residual weight correction , pre-target alerts etc*
- *Two direction GPRS data transfer between scale and Tamtron Cloud*
- *Wnexus cloud service for online monitoring of weighing data*
- *Weighing function integrated to onboard PC via XML interface*
- *Weighing data can be integrated to customer ERP system*
